We would like to inform you that applying a label to a DVD may affect the life of the DVD. Over time the label may loosen and cause a reading problem with your DVD player. Grover Productions only use Special ultra-thin clear inkjet printable composite polymer inkjet labels which will adhere permanently to discs, preventing the curled edges and playback wobbling errors you could experience with older, thicker labels. **Grover Productions will not be responsible for DVD playback errors with DVD's that have labels on them.**

**Photos:** How many photos are you using for your show? \_\_\_\_\_

**Length of each photo:** This is the length each photo will be displayed on your screen. 7 seconds is the standard.

? 5 seconds ? 7 seconds ? 10 seconds

**Note: Time may be adjusted to synch with music**

**Transitions:** There are many different transitions that can be used for your DVD picture slideshow. Grover productions recommend using a standard fade or no transition at all. When viewing a picture slideshow you want to concentrate on the photos and not the transitions. **In our experience we have found transitions to be distracting. This is only our opinion.** Please check one below:

? Random      ? Standard Fade      ? None:

**Title Slides:** Three title slides are included in the standard package. Title slides can be used in two ways: A title slide can be used before a picture to describe a group of photos that follows or a title slide can be displayed over a photo to describe that individual photo. (Ex: Before Photo #45, insert Happy Birthday or Over Photo #45 insert Happy Birthday).

If you place your order, receive your package and realize your DVD player does not support DVD-R discs, we can provide you a VHS copy of your show for an additional price.
